This book is now available in a consumable Student Practice Book edition

Benefit from the same targeted practice in a time- and money-saving format.

- Costs less per page than reproducing copies
- Conserves your copy quota
- No more waiting in line at the copy machine
- No more collating and stapling each weekly unit
- AND you have an easily accessible record of each student's skill acquisition

Daily Math Practice consumable Student Practice Books

112 perforated pages for each individual book. Student Practice Books are sold in 5-packs.

EMC 6527 Grade 1 \$19.99 EMC 6528 Grade 2 \$19.99 EMC 6529 Grade 3 \$19.99 EMC 6530 Grade 4 \$19.99 EMC 6531 Grade 5 \$19.99 EMC 6532 Grade 6+ \$19.99

What's in

Daily Math Practice

36 Weekly Sections

Monday through Thursday

• two computation problems

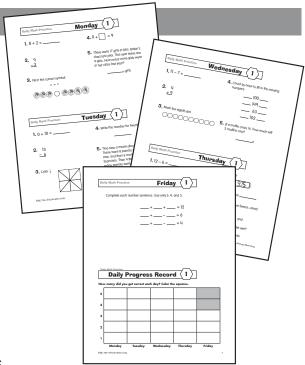

Weeks 1–4—addition and subtraction only Weeks 5–36—addition, subtraction, multiplication, and division

- two items that practice a variety of math skills
- one word problem

Friday

Friday's format includes one problem that is more extensive and may require multiple steps. These problems emphasize reasoning and communication in mathematics.

Also featured on Friday is a graph form where students record the number of problems they got correct each day that week.

Additional Features

Scope and Sequence

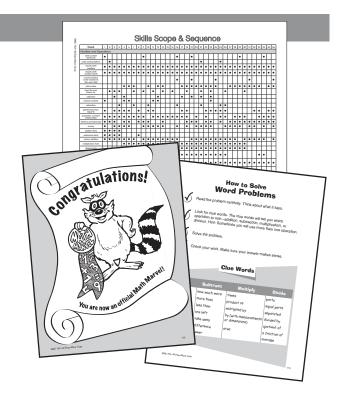

Scope and sequence charts on pages 3 and 4 detail the specific skills to be practiced and show when they will be presented. The skills included are found in math texts at this level.

Answer Key

The answer key begins on page 117.

How to Solve Word Problems Chart

Award Certificate

How to Use Daily Math Practice

You may want to use all of the following presentations throughout the year to keep each lesson fresh and interesting.

- 1. Make overhead transparencies of the lessons. Present each lesson as an oral activity with the entire class. Write answers and make corrections using an erasable marker.
 - As the class becomes more familiar with Daily Math Practice, you may want students to mark their answers first and then check them against correct responses marked on the transparency.
- 2. Reproduce the pages for individuals or partners to work on independently. Check answers as a group, using an overhead transparency to model the correct answers. (Use these pages as independent practice only after much oral group experience with the lessons.)
- 3. Occasionally you may want to use a day's or even a full week's lesson(s) as a test to see how individuals are progressing in their acquisition of skills.

Some Important Considerations

- 1. Allow students to use whatever tools they need to solve problems. Some students will choose to use manipulatives, while others will want to make drawings.
- 2. It is important that students be able to share their solutions. This modeling of a variety of problem-solving techniques provides a great learning benefit. Don't scrimp on the amount of time you allow for discussing how solutions were reached.
- 3. With the focus of the first four days being on computation and problem solving, it is recommended that calculators be used only on Fridays, when the focus is much more detailed, with less emphasis on computation. In some instances, however, you may want to allow the use of calculators to solve the daily word problems.

Suggestions and Options

- 1. Sometimes you will not have taught a given skill before it appears in a lesson. These items should then be done together. Tell the class that you are going to work on a skill they have not yet been taught. Use the practice time to conduct a minilesson on that skill.
- 2. Customize the daily lessons to the needs of your class.
 - If there are skills that are not included in the grade-level expectancies of the particular program you teach, you may choose to skip those items.
 - If you feel your class needs more practice than is provided, add these "extras" on your own in the form of a one-item warm-up or posttest.
- 3. Many of the Friday problems are quite challenging and lend themselves to partner or small-group collaboration.

How to Solve Word Problems

Read the problem carefully. Think about what it says.

Look for clue words. The clue words will tell you which operation to use—addition, subtraction, multiplication, or division. Hint: Sometimes you will use more than one operation.

Solve the problem.

Check your work. Make sure your answer makes sense.

Clue Words

Add	Subtract	Multiply	Divide
in all	how much more	times	part <i>s</i>
altogether	more than	product of	equal parts
total	less than	multiplied by	separated
sum	are left	by (with measurements	divided by
both	take away	or dimensions)	quotient of
plus	difference	area	a fraction of
	fewer		average

About Evan-Moor Educational Publishers

Who We Are

- At Evan-Moor, we are proud that our products are written, edited, and tested by professional educators.
- Evan-Moor's materials are directed to teachers and parents of prekindergarten through sixth-grade students.
- We address all major curriculum areas, including:

reading social studies thematic units writing geography arts & crafts math science

How We Began

- In 1979, Joy Evans and Jo Ellen Moore were team-teaching first grade in a Title I school. They decided to put ideas that worked for their students into a book. They joined with Bill Evans (Joy's brother) to start Evan-Moor Educational Publishers with one book.
- Bill and Joy's parents' garage served as the warehouse and shipping facility.
- The first catalog was a folded 8½" x 11" sheet of paper!

Who We Became

- Evan-Moor now offers over 450 titles.
 Our materials can be found in over 1,500 educational and trade book stores around the world.
- We mail almost 2 million catalogs a year to schools and individual teachers.
- Our Web site <u>www.evan-moor.com</u> offers 24-hour service and the ability to download many of our titles.
- Evan-Moor is located in a 20,000-square-foot facility in Monterey, California, with a staff of nearly 60 professionals.

Our Mission

Now, as then, we are dedicated to helping children learn. We think it is the world's most important job, and we strive to assist teachers and parents in this essential endeavor.
