STAR PUBLISHING PTE LTD

Preface

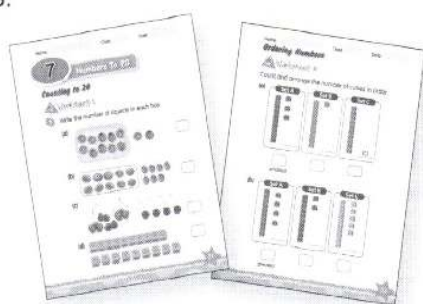

Targeting Mathematics is a series of textbooks and workbooks written based on the latest Primary Mathematics Syllabus provided by the Ministry of Education, Singapore. This series supports the Concrete-Pictorial-Abstract approach and the use of ICT tools to enhance conceptual understanding. It incorporates the use of manipulatives, videos and online math activities as teaching aids to enhance teaching of mathematics.

The exercises in the workbooks are designed to support learning in a progressive manner. Through a combination of drilling, challenging and problem solving exercises, pupils can consolidate their mathematical concepts and build confidence in learning mathematics.

Features

L1 Worksheets

Level 1 worksheets provide questions that test a pupil's understanding of mathematical concepts.

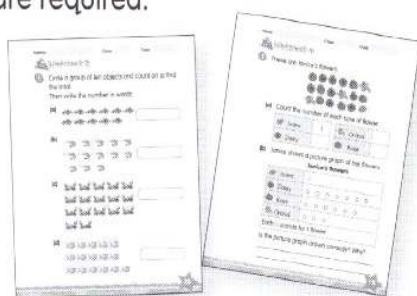

Problem Solving

These activities are designed to challenge pupils to be creative in solving problems.

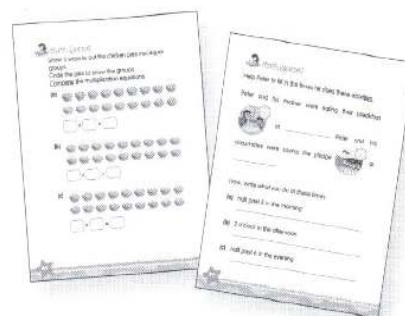

L2 Worksheets

Level 2 worksheets contain more challenging questions where higher order thinking and process skills are required.

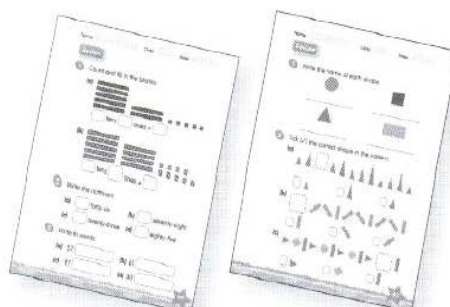

Math Journal

This allows pupils to reflect on their learning.

Review

The review exercises allow pupils to revise and consolidate mathematical concepts learnt.
